HOW MUCH DO YOU REALLY KNOW ABOUT SURGICAL BILLING AND CODING?

This program dedicates six hours to surgical coding. No other coding programs dedicate this amount of time to surgical coding for foot and ankle surgeons. Case-based surgical coding scenarios cover the surgical coding process from end-to-end by looking at the diagnostic coding, procedural coding, and billing for each scenario. Use the information you've learned during the seminar to code a patient encounter from beginning to end.

This seminar will also dispel common myths that negatively impact your productivity and bottom line.

“This surgical coding workshop had **more take-home essential information** than any other I have attended. **This program is a “must” to not only survive but excel** in this new realm of coding. We all want to bill appropriately, but we do not want to “leave any money on the table.” In addition to outstanding lectures, the course also includes a comprehensive workbook which is invaluable.”

– *Timothy E. Pitts, DPM, FACFAS*

LECTURES SPECIFICALLY FOR THE FOOT AND ANKLE SURGEON AND STAFF

During this seminar, we'll discuss everything that a foot and ankle surgeon and their staff need to know: changing reimbursement programs, evaluation and management, surgical coding, and mystifying modifiers, with durable medical equipment sprinkled within several of the lectures.
