

AMERICAN COLLEGE OF FOOT AND ANKLE SURGEONS

# COMPREHENSIVE INTERNAL FIXATION COURSE

AUGUST 19–21, 2021 • HYATT REGENCY DFW INTERNATIONAL AIRPORT, DALLAS, TX

Join expert faculty for a deep dive into podiatric internal fixation surgery!  
You'll walk away from this 3-day workshop with the knowledge and skills to:

- Apply the principles of internal and external fixation to foot and ankle surgery—including major rearfoot and ankle arthrodesis techniques.
- Identify the problems, complications, and intraoperative difficulties that can result from internal and external fixation.
- Implement principles and techniques in a wide variety of complex foot and ankle fractures, multiple revisional and reconstructive surgical techniques of the lower extremity—including specialty plating and external fixation techniques.
- Avoid complications and improve outcomes through preoperative planning.
- Apply psycho-motor skills developed in extensive practical lab exercises.

## Comprehensive Course (20 CME)

This all-new course (continuing on from the previous AO/AAFAO workshops) brings together many innovators in the field of podiatric internal fixation surgery. Faculty will present thorough and up-to-date information on osteosynthesis in the lower extremity. The course is designed to cover the principles and techniques for stable internal fixation for fracture management, aspects of diagnosis, and treatment and subsequent management of these injuries. The most current and innovative principles and techniques of stable internal fixation and their applications will be covered.
