**Current Primary Position:** Partner, Orthopaedic Institute of Central Jersey, Manasquan, Red Bank, Freehold, Toms River, NJ

## **Position Statement:**

It is my honor to accept the nomination as a candidate for the ACFAS Board of Directors.

I am a graduate of Temple University School of Podiatric Medicine and completed a three-year podiatric surgical residency at Graduate Hospital, Philadelphia, Pennsylvania. I have been a fellow of American College of Foot and Ankle Surgery since 2003.

I have been involved in academic and professional leadership positions including, resident training, both podiatric and orthopaedic, since 2005. Currently, I am the foot and ankle Fellowship Director at the Orthopaedic Institute. I am the current chair of the Educational Scientific Affairs Committee and have been a volunteer member of the same committee since 2015. I have been a case reviewer for the American Board of Foot and Ankle Surgery since 2014 and serve as a section editor for adult reconstruction in rearfoot and ankle for the Journal of Foot and Ankle Surgery

My primary goal as a board member is to ensure the continued path of excellence set forth by previous leadership, ACFAS staff, and prior and current ACFAS members in promoting our position as superior providers of foot and ankle surgery. My vision for our profession is to transform public perception to what already is a reality: that as a profession we provide and deliver the highest quality foot and ankle services compared to any other provider. We have, as an organization, the ability to create a national registry and to organize and publish our collective outcomes that will allow us to capitalize on the profession's evidence-based data to support this cause.

I believe my background as a board member at Northern Monmouth Regional Surgery Center, and president of my home owner's association, have provided me ample experience that will enable me to represent the collective interests of all, while understanding the concerns and needs of each individual member. My experience as a collegiate athlete lends further support to my understanding of the importance of a team concept and the commitment it takes to accomplish the goal of continually providing the most advanced foot and ankle educational curriculum.

I believe our College can enhance its standing by offering international education with a continued focus on increasing our membership enrollment. We should continue to foster our corporate relationships, while focusing on strengthening our financial position.

Being a board member means listening to our membership, aiding in executing strategic missions, understanding, and allocating appropriate resources to match our strategic goals. I am confident if elected that I will loyally execute those responsibilities, while consistently promoting the members' best interests and organization's purpose.

Our future is bright as a College, and with the right leadership and properly directed resources, we can become the world leaders in the specialty of foot and ankle surgery.
