

2012 Catalog

Surgical Skills Courses

American College of
Foot and Ankle Surgeons®

Proven leaders. Lifelong learners. Changing lives.

The perfect blend of the proven and the cutting edge—ACFAS launched their first Surgical Skills Courses 16-years ago—moving forward these programs continue to expand clinical knowledge. Through lectures, focused panel discussions, surgical videos and most of your time spent on hands-on cadaver lab activities with personalized one-on-one instruction, ACFAS Surgical Skills Courses update practicing surgeons. Our obligation to our patients—to keep current—requires our valuable time.

ENJOY THE SUBTLE WORKINGS of brilliant minds

In 2012, the College is again offering an unmatched curriculum.

See things differently and add to your surgical and decision making skills.

- Learn state-of-the-art pathways, the use of orthobiologic adjuncts and current trends
- Perform surgical procedures
- Recognize problems and how to handle complications and the risks associated with a variety of treatment approaches
- Become familiar with advanced and restorative techniques of foot and ankle surgery

You'll spend more than 80% of your time in the hands-on lab.

16 CONTINUING EDUCATION CONTACT HOURS

This interactive two-day, hands-on, course is led by a renowned faculty of skilled arthroscopy surgeons and gives you the opportunity to learn and practice established and cutting edge techniques in surgery for the foot and ankle.

The course features 9 hours of hands-on laboratory time with the latest equipment and techniques on fresh cadaver specimens. Lecture presentations will be enhanced with videos of actual arthroscopic cases. There will be ample opportunity for interaction with faculty. *One cadaver per two registrants.*

OBJECTIVES:

- Refine arthroscopic techniques of the ankle and subtalar joint, with a focus on motor skill development.
- Identify and understand indications for arthroscopic foot and ankle surgery.
- Understand and perform the two portal anterior approach to the ankle and be introduced to the posterior portal approach.
- Effectively perform soft tissue techniques including synovectomy, fibrous band resection, and gutter debridement.
- Be able to approach, resect and saucerize medial and lateral talar dome lesions.
- Be able to retrieve loose bodies in the ankle and be introduced to arthroscopic excision of the os trigonum.
- Be introduced to arthroscopy of the small joints of the foot.
- Be introduced to endoscopic examination of tendons of the foot and ankle.
- Understand and perform an arthroscopic ankle fusion.
- Understand the risks and complications of foot and ankle arthroscopy and their management.
- Familiarized with advanced arthroscopic equipment available including thermal ablation, motorized instrumentation, hand instruments, microvector techniques and distraction.

DINNER AND FIRESIDE CHAT

BRING YOUR CASES and enjoy one of the highlights of the course...the fireside chat. **You are encouraged to bring x-rays and CDs of your cases.** This session provides a collegial exchange of ideas and dialog on a variety of topics; gather opinions from experienced faculty and participants. The fireside is held at the hotel and lasts about two hours during and after dinner the first day of the course (June—Friday night; August and December—Saturday night).

June 15–16, 2012

(Friday/Saturday)

Surgical Solutions for Complications of the Forefoot

November 2, 2012
(Friday)

DoubleTree by Hilton Hotel & Suites
Jersey City, NJ

This one-day comprehensive course will focus on complications associated with the management of forefoot surgery through a series of didactic lectures and case-based discussions on the following pathologies: failed 1st ray surgery (bunion head and base procedures), lesser metatarsal surgery (pre-dislocation syndrome, transfer metatarsalgia, AVN, tailors bunions, base fractures) failed digital surgery (floppy toe, mal-alignment, recontracture), lis francs pathologies (failed ORIF, failed arthrodesis, mal-alignment), and soft tissue surgery (failed neuroma). Our experienced faculty will present their views on managing complications, both primary and referred.

Course will be hands-on, *one cadaver for each registrant*. Instructors will assist in the hands-on lab to help you in developing techniques to make surgical complications less challenging.

LEARNING OBJECTIVES:

- Identify ways to avoid, analyze and manage surgical complications.
- Identify non-surgical risk factors that can affect surgical outcomes.
- Analyze case-based approaches to deal with complications of the forefoot.
- Develop surgical complication thought processes and develop surgical techniques for the definitive reconstruction.

Surgical Solutions for Complications of the Rearfoot and Ankle

November 3, 2012
(Saturday)

DoubleTree by Hilton Hotel & Suites
Jersey City, NJ

This one-day comprehensive course will focus on complications associated with the management of rearfoot surgery through a series of didactic lectures and case-based discussions on the following pathologies: trauma complications, failed osteotomies/reconstruction, failed rearfoot arthrodesis (navicular cuneiform, calcaneal cuboid, subtalar joint, ankle joint), revision of failed soft tissue surgery (Achilles, posterior tibial tendon, peroneal tendon surgery, lateral ankle stabilization). Our experienced faculty will present their views on managing complications, both primary and referred.

Course will be hands-on, *one cadaver for each registrant*. Instructors will assist in hands-on approach to help you get the most out of 8 hours.

OBJECTIVES:

- Identify ways to avoid, analyze and manage surgical complications.
- Identify non-surgical risk factors that can affect surgical outcomes.
- Analyze case-based approaches to deal with complications of the rearfoot and ankle.
- Develop surgical complication thought processes and develop surgical techniques for the definitive reconstruction.

Trauma of the Foot & Ankle Surgical Skills Course

November 10-11, 2012

(Saturday/Sunday)

Orthopaedic Learning Center (OLC) | 6300 N. River Rd., Rosemont (Chicago), IL

16 CONTINUING EDUCATION CONTACT HOURS

A highly skilled and experienced faculty will present focused didactic lectures. The lecture format has been developed to emphasize the contemporary philosophy for management of foot and ankle injuries, surgical approaches, reduction techniques, and fixation constructs for foot and ankle fractures. A video presentation shown prior to each corresponding lab exercise will further demonstrate the technical points of fracture management. This course will illustrate the rationale for specific treatment recommendations as well areas of controversy.

The faculty has also been specifically selected for their ability to interact as a lab instructor on a personal level with each participant. High quality, fresh cadaver specimen, with created foot and ankle fractures, will produce a simulated life-like scenario for the attendees. An extensive selection of internal and external fixation devices will be available for the participant to utilize. At the conclusion of the course, the participant should possess the cognitive and technical skills to successfully and confidently manage common and complex foot and ankle fractures. *One cadaver per registrant.*

LEARNING OBJECTIVES:

- Effectively evaluate and manage patients with simple and complex, commonly encountered fractures and dislocations of the foot and ankle.
- Be knowledgeable in the selection of procedures and performing appropriate internal and external fixation techniques.
- Understand the importance and evaluation of soft tissue injuries with respect to appropriate timing for surgical management of foot and ankle fractures.
- Be able to technically execute anatomic reduction and fixation of foot and ankle fractures and dislocations.
- Understand the work-up and management philosophy of complex foot and ankle injuries including open fractures, midfoot fractures, talar fractures, and pilon fractures.

Course Chairman:

General Information

Accreditation

The American College of Foot and Ankle Surgeons is approved by the Council on Podiatric Medical Education as a sponsor of continuing education in podiatric medicine.

California Radiology Credit: Every hour of lecture in scientific sessions can confer up to 0.6 hour of radiology credit.

Course Policies

To participate in surgical skills courses, you will be required to sign a waiver of liability prior to the course. College policy mandates that every individual must wear protective wear provided by the laboratory during the lab sessions in order to participate in these courses.

Course registrants are to bring their own scrubs to wear in the lab.

Disclaimer

The ACFAS surgical skills courses are made available as an educational service to its members and other members of the podiatric profession. The ACFAS has not independently evaluated the content or techniques discussed or demonstrated by any faculty member. The ACFAS does not warrant or endorse any content or technique discussed or demonstrated by any faculty member. Statements about commercial products are solely the opinion(s) of the presenter(s) and do not represent a College endorsement or evaluation of these products. Additionally, any instrumentation shown/ demonstrated during this program may or may not have received FDA approval.

Photographs/Videos

ACFAS routinely takes photos or video of participants in meetings and other course venues for news and other purposes. By registering for the course, you grant ACFAS permission to utilize photos of you taken at the course for ACFAS purposes.

Tax Deduction for Education Purposes

In the United States, an income tax deduction may be allowed for education expenses undertaken to maintain or improve professional skills. This includes registration, travel, meals and lodging, subject to applicable limitations (see Treas. Reg. 1.162-5; Coughlin v Commissioner, 203 F.2d 307 (2d Cir.1953)).

Attendees with Special Needs

If you have special needs addressed by the Americans with Disabilities Act, or if you have special dietary needs, notify the ACFAS at the time you register. We will make every effort to accommodate your needs.

Cancellation Policy

Cancellation requests must be in writing. Requests received by the ACFAS four (4) weeks prior to the course date will receive a full refund minus \$75 administrative fee. No refunds will be made for cancellations received less than four (4) weeks prior to the course.

ACFAS is unable to assume risk or responsibility for the registrant's time or expenses should an act of God, government action, aviation disruption, disaster, weather, or other force beyond the control of ACFAS make it inadvisable or impossible to conduct this event. The registrant may wish to consider purchasing personal travel insurance to insure his/her expenses.

People are saying ... about ACFAS Surgical Skills Courses

**Faculty are bright and cutting edge.
Discussions lively, positive interactions
in the lab. Worth the time and expense!**

—Gregory Catalano, DPM, FACFAS

Superb course; well done.

—Peter Blume, DPM, FACFAS

**Excellent workshop. Perfect transition
from beginning to end. Faculty was
excellent and very knowledgeable.**

—Shital Sharma, DPM, Resident

**Excellent lab/lecture, love the open
forum discussion.**

—Richard Limperos, DPM, Resident

**By far, in ten years, this is the best course
that I have attended! You cannot beat the
hands on experience that you get with all
of the equipment and cadavers. I would
recommend this course to everyone.
Wonderful faculty! Thank you for a
wonderful learning experience!**

—Frederick S. Mechanik, DPM, FACFAS
